

PALLET BLOCKS

MAIN FEATURES

Material

The **basic materials** are natural coniferous and recycled timber chips. When the bonded chips are compressed under great pressure and high temperature, this produces a homogenous and high-quality wood material. Pallet blocks, in connection with the benefits from natural timber (with their natural resilience and elasticity) produce premium pallets.

Quality

EUROBLOCK-pallet blocks are manufactured according to stringent quality criteria and the production process is monitored by **SGS-ControllCo**. As a result of their superior product and application features, **EUROBLOCK**-pallet blocks are approved by EPAL, major rental pools and many big end users.

Export regulations

EUROBLOCK-pallet blocks are classed as „no-solid-wood“ and do not require any special handling. See information **“no-solid-wood“** at www.euroblock.com

PEFC certified

This product is from sustainably managed forests and controlled sources.

Presswood Int. BV

Main features

- No splitting
- Low space requirement for storage
- Low needs for repairs

- High nail retention resistance
- Longer service life
- Constant quality

- Very good safety for automatic pallet production and in computer-controlled high bay shelving warehouses
- Ready for installation
- More efficient production
- No investment for cross-cutting and planing equipment
- No off-cuts, no waste

- No drying costs – moisture content on delivery 8 %
- True to size with uniform moisture content
- Retains shape if the temperature fluctuates

- Environmentally friendly timber product of natural coniferous chips and old timber/ recycling material
- Contains no CFCs
- Biologically degradable

- “no-solid-wood” material according to international regulations for the treatment of timber packaging – ISPM 15
- No SIREX treatment required
- No mould or insect damage

EUROBLOCK-pallet blocks made of wood chips – for pallets and timber packaging of all types.
Special heights of 60 – 120 mm on request.
